

TBN

Ventilador Centrífugo Tubular

Soler&Palau  **Ventilation Group**

Información general

*La puerta de mantenimiento es un accesorio.

Un equipo tubular centrífugo construido con rodete de álabes curvos atrasados, con un nivel de alta eficiencia y un bajo nivel sonoro. Integrado por 12 tamaños nominales que van del 315 al 1120.

Esta serie está disponible en acoplamiento directo, transmisión poleas-bandas y motor conmutado electrónicamente. Sus aplicaciones van desde comerciales hasta industriales, donde se requiere el manejo de aire limpio con hasta 500 mg por m³ de polvo.

Nomenclatura

TBN - D I 400 - 4P - 1 1/2

Modelo
Tubular Centrífugo

Acoplamiento
D: Directo
T: Transmisión poleas-bandas

Clase
I: Clase I
II: Clase II

Tamaño nominal del rodete
315, 355, 400, 450, 500, 560, 600, 710, 800, 900, 1000 y 1120.

Acoplamiento Directo
4P: 1,800 RPM
6P: 1,200 RPM
Transmisión Poleas-Bandas
400 - 4,600 RPM

Potencia instalada
1/4 - 40 HP

Características constructivas

Carcasa con vanos que reducen la turbulencia e incrementan la eficiencia, soportes de sujeción que facilitan la instalación y base motor fabricados en acero con acabado en pintura de polvo poliéster de aplicación electrostática.

Rodetes de álabes atrasados curvos fabricados en acero al carbón, dinámicamente balanceados a grado G 6.3 siguiendo lo establecido por la normativa: ISO 1940 o AMCA 204, acabado en pintura de polvo poliéster y con giro CW.

Oído de aspiración con diseño aerodinámico que permite aspiración de aire con menor turbulencia.

Los **motores** son bajo **especificación NEMA** y cuentan con alta eficiencia en su desempeño para cada operación. Están diseñados para ser arrancados directos en línea de alimentación y capaces de soportar variaciones de $\pm 10\%$ en la tensión de alimentación (por periodos cortos de tiempo), y de $\pm 5\%$ de forma constante, sin presentar variaciones en su operación (Aplica para TBN -D y TBN -T).

Chumaceras de bolas con sistema de fijación de anillo concéntrico para brindar mejor agarre y menos vibración durante su funcionamiento. La fuerza de sujeción de 360° reduce la vibración por medio de una concentricidad mejorada. La clase I utiliza rodamientos para servicio de uso general. Mientras que la Clase II para servicio semipesado (Aplica para TBN -T).

Extensión de graseras que facilitan la lubricación de los rodamientos (Aplica para TBN -T).

Los **ejes** se fabrican en acero AISI C°1045, utilizando un proceso automático para el posicionamiento y corte de los cuñeros. Así mismo, son revestidos con un barniz anticorrosivo (Aplica para TBN -T).

*Los dibujos mostrados son únicamente ilustrativos.

Curva característica TBN - T 1120

Ejemplo de Selección de Atenuador

Se tiene un equipo centrífugo de diámetro nominal 710 con el siguiente espectro sonoro:

Octavas	63 Hz	125 Hz	250 Hz	500 Hz	1000 Hz	2000 Hz	4000 Hz	8000 Hz
LwA Ventilador	51	77	76	86	86	82	73	72

Se instalará en un recinto donde se requiere un NC 70. El caudal generado por dicho equipo es de 11,033 m³ / hr y la velocidad de salida es menor a 5 m/s. Debemos tomar los valores NC 70 dentro de la tabla de referencia e implementarle en el lugar donde será colocado el equipo de ventilación y el atenuador.

Octavas	63 Hz	125 Hz	250 Hz	500 Hz	1000 Hz	2000 Hz	4000 Hz	8000 Hz
LwA Ventilador	51	77	76	86	86	82	73	72
NC 70	84	79	75	72	71	70	68	68

Se realiza una resta aritmética de los valores referenciados.

Octavas	63 Hz	125 Hz	250 Hz	500 Hz	1000 Hz	2000 Hz	4000 Hz	8000 Hz
LwA Ventilador	51	77	76	86	86	82	73	72
NC 70	84	79	75	72	71	70	68	68
LwA Ventilador - NC 70	-33	-2	1	14	15	12	5	4

Localizar en las **tablas de atenuación** de cada modelo, los valores más cercanos en las frecuencias 1 y 2 kHz basados en el diámetro y longitud, y de preferencia en busca del mayor nivel de atenuación.

Con núcleo	Longitud			Ø interno mm.	Ø externo mm.	Longitud	Atenuación - IL (dB) @ Hz							
	1.0 Ø	1.5 Ø	2.0 Ø				63 Hz	125 Hz	250 Hz	500 Hz	1000 Hz	2000 Hz	4000 Hz	8000 Hz

Selección

Atenuador tubular de diámetro **1000 mm**, con **núcleo interno** y **1.0 m de longitud** con un nivel de atenuación de **20 y 24 dB** en las frecuencias **500 Hz y 1kHz**.

TBN - VENTILADOR CENTRÍFUGO TUBULAR

Ejemplo de Selección de Atenuador

Una vez elegido el espectro correspondiente, se restarán aritméticamente los valores de atenuación por octavas de banda, del atenuador al espectro sonoro del ventilador.

Octavas	63 Hz	125 Hz	250 Hz	500 Hz	1000 Hz	2000 Hz	4000 Hz	8000 Hz
LwA Ventilador	51	77	76	86	86	82	73	72
NC 70	0	8	14	20	24	21	14	7
LwA Ventilador - NC 70	51	69	62	66	62	61	59	65

Una vez con el espectro del ventilador atenuado, revisaremos el efecto que se generará por la velocidad de paso dentro del atenuador. Para ello, recurriremos a la tabla de atenuación general y tomaremos el espectro sonoro correspondiente a la velocidad de salida marcada como menor a 5 m/s.

Velocidad de aire	Nivel de potencia sonora generada por silenciador							
	Octavas de banda Hz							
m/sec (ft/min)	63 Hz	125 Hz	250 Hz	500 Hz	1000 Hz	2000 Hz	4000 Hz	8000 Hz
<5 (<1000)	62	43	38	39	36	25	22	28

Se sumarán logaritmicamente (**LwA Ventilador atenuado + Sonido regenerado**), hasta obtener el espectro sonoro del ventilador atenuado.

Octavas	63 Hz	125 Hz	250 Hz	500 Hz	1000 Hz	2000 Hz	4000 Hz	8000 Hz
LwA Ventilador atenuado	51	69	62	66	62	61	59	65
Sonido regenerado	62	43	38	39	36	25	22	28
Suma logarítmica	62	69	62	66	62	61	59	65

Por último, partiendo de un ventilador con espectro sonoro:

Octavas	63 Hz	125 Hz	250 Hz	500 Hz	1000 Hz	2000 Hz	4000 Hz	8000 Hz
LwA Ventilador	51	77	76	86	86	82	73	72

Seleccionando y acoplando un atenuador del mismo diámetro y con 1 vez su diámetro de largo, se logra reducir el espectro sonoro de la misma fuente al siguiente espectro. Se demuestra una reducción promedio del nivel sonoro por octavas de banda.

Octavas	63 Hz	125 Hz	250 Hz	500 Hz	1000 Hz	2000 Hz	4000 Hz	8000 Hz
LwA Ventilador	62	69	62	66	62	61	59	65

Accesorios

- Puerta de inspección
- Cubre banda
- Cubierta motor
- Interruptor eléctrico
- Resortes colgantes y de piso
- Mallas de protección en succión y descarga
- Atenuadores
